Brad,

We cannot grant final approval of the SEP at this time. As indicated in App. C of your submittal of invoices that UTC deducted SEP expenses on its income taxes in contradiction with Paragraph 71 of the Carrier CD.

Please submit documentation as soon as this issue has been resolved (expected in August 2014) so that we may verify and grant final approval.

Subject: Follow up on R9FOIA Request - EPA-R9-2014-009888

Ms. O'Dea Brill,

Per our discussion this morning on EPA R9-FOIA-2014-0009888. The FOIA will be prepared under a two track process One through the Region 9 Superfund program and the other through EPA's Office of Criminal Enforcement Forensics and Training (OCEFT) in Washington, DC.

I will responding to your general request for all records related to Northrop Grumman/TRW. You agreed to consider whether the request will be limited to records provided to EPA (a) prior to Dec 2012; and/or (b) after Dec 2012. Please note the PVOU Administrative Record was last updated in Sep 2011 just prior to the issuance of the UAO 2011-14 to Northrop Grumman.

EPA will work to accommodate your request by October 1, 2014, however, due to the potential high volume of documents, we are requesting a 15-day extension to October 16, 2014.

Please feel free to call me at 415.947.4218 if you have any questions.

Raymond Chavira

Subject: RE: Follow up on R9FOIA Request - EPA-R9-2014-009888

Dear Mr. Chavira:

Thank you for our phone conversation yesterday. This email confirms our discussion and clarifies what we are seeking through the FOIA request.

Our request focuses on records directly related to Northrop Grumman's withholding of information from EPA. Any records obtained or received by EPA that mention the withholding by Northrop Grumman (including its predecessors, affiliates, employees, consultants and other agents) of information from EPA are included. Likewise, any records generated within EPA that mention Northrop Grumman's withholding of information are included. The types of records sought include emails, letters, and memoranda, both internal to EPA and involving outside parties.

We are not interested in receiving data, including that related to the 2002/3 Deep Source Investigation or to the former TRW/Benchmark Technology, Inc., facility, unless it is in a document that mentions withholding.

In clarifying this FOIA request, I hope that the burden of production is reduced. I greatly appreciate your assistance in this process. I understand this is a busy time in your office.

I am not authorized to agree to an extension. I apologize for any inconvenience.

If the request remains unclear or confusing in any way, please call me to discuss it.

Respectfully,

Maureen

Subject: Vapor Intrusion Analysis

Ray,

Re the voicemail you left yesterday:

As part of the ambient air sampling currently scheduled for August 31 – September 1, Tetra Tech will have four extra Summa canisters on hand. Two of the canisters will be available as contingent sampling points in the event that pre-sampling screening with a PID identifies potential sources of vapor intrusion at well vaults, utility vaults, floor drains, and other potential vapor intrusion conduits in the area of interest. If PID readings greater than 100 ppb are observed at a well vault, utility vault, floor drain or potential vapor intrusion conduit greater than 100 feet away from an existing sampling location, then Tetra Tech will set up a Summa canister at that location.

The remaining two Summa canisters will be kept on hand as replacement canisters. During the first hour of the sampling event, Tetra Tech personnel will monitor the status of the canisters to ensure that the valves are operating as designed. In the event that there are valves that fail, or are determined to have been miscalibrated by the lab, Tetra Tech will use the spare Summa canisters as replacements.

Subject: Decoupling of General Comment 2 of the USEPA's September 8, 2014 Comment Letter - PVOU SZN Baseline Water Quality Evaluation Technical Memorandum

Ray,

The purpose of this e-mail is to confirm that consistent with our September 11, 2014 conference call discussion, the USEPA is no longer requiring UTC/Carrier to submit a response to General Comment 2 of your September 8, 2014 (see attachment) comment letter by September 22, 2014. UTC/Carrier will respond to all other comments associated with September 8, 2014 comment letter by September 22, 2014.

Please reply with your concurrence.

Subject: RE: Draft Presentation for RWQCB

Ray, we have already begun preparation of the draft presentation you referenced below. However without EPA's comments to the Baseline Water Quality Technical Memorandum and other supporting information (e.g., most recent draft cross sections prepared by Northrop-Grumman and EPA, etc.) any draft presentation will likely have considerable missing components/slides. Given the timing of EPA's comments to the Baseline Water Quality Technical Memorandum (scheduled for distribution on September 2, 2014) we believe a submittal date for the Draft RWQCB Presentation on September 4, 2014 is premature. As such, we cannot confirm that the Draft RWQCB Presentation will be submitted on September 4, 2014.

I would suggest that we have a conference call to discuss the EPA comments (once received) and their impact on the Draft RWQCB Presentation, agree/confirm on the anticipated content of the Draft RWQCB Presentation and then proceed with final preparation and submittal of a Draft RWQCB Presentation. We can identify the anticipated Draft RWQCB Presentation submittal date following our discussion of EPA comments to the Baseline Water Quality Technical Memorandum.

Subject: PVOU Matter - AGENDA for the Meeting

Hello Ray,

The agenda is relatively simple.

UTC/Carrier plans to discuss with EPA the following topic areas:

1. The historical and current situation in the PVOU, with a focus on the impact of new data on the emerging SCM
2. Implementation issues for the 1998 IROD
3. The path forward for EPA and Carrier/UTC

We plan to share a presentation with EPA that guides us through this discussion.

Regards, Brian

Subject: Follow up on R9FOIA Request - EPA-R9-2014-009888

Ms. O'Dea Brill,

Per our discussion this morning on EPA R9-FOIA-2014-0009888. The FOIA will be prepared under a two track process One through the Region 9 Superfund program and the other through EPA's Office of Criminal Enforcement Forensics and Training (OCEFT) in Washington, DC.

I will responding to your general request for all records related to Northrop Grumman/TRW. You agreed to consider whether the request will be limited to records provided to EPA (a) prior to Dec 2012; and/or (b) after Dec 2012. Please note the PVOU Administrative Record was last updated in Sep 2011 just prior to the issuance of the UAO 2011-14 to Northrop Grumman.

EPA will work to accommodate your request by October 1, 2014, however, due to the potential high volume of documents, we are requesting a 15-day extension to October 16, 2014.

Please feel free to call me at 415.947.4218 if you have any questions.

Subject: RE: Draft Access Agreement between Northrop-Grumman and UTC for S-11A Pumping Test

Ray, in response to your question concerning the status of Northrop-Grumman's access to monitoring and extraction wells for their upcoming performance of the EPA requested long-term aquifer Pumping Test, the following information is provided:

- Northrop-Grumman and UTC do not have an agreement to allow Northrop-Grumman access to monitoring and extraction wells under UTC's control (VCW-7, S11A, S11, VCW-03 and S9) identified in your October 28, 2014 e-mail to Klaus Rohwer (consultant to Northrop-Grumman). As such, UTC will require Northrop-Grumman to submit a formal Access Agreement to UTC for review and execution prior to granting any access. This should be an easy process as Northrop-Grumman can simply modify the Draft Access Agreement UTC forwarded to you on October 28, 2014 in association with the planned use Extraction Well S11A for this test.

Therefore, please forward the Draft Access Agreement to Northrop-Grumman so that they can transfer the document to their letterhead, insert appropriate monitoring and extraction well names and numbers, insert appropriate company representative names, etc., and return the Access Agreement and necessary attachments to David Platt Esq. (UTC) for execution. We will return the executed agreement to Northrop-Grumman promptly so as to minimize potential delay in this activity.

Subject: [External] RE: Draft Access Agreement between Northrop-Grumman and UTC for S-11A Pumping Test

Brad,

Unfortunately, we made the decision to move forward with MZ-1 this morning. S11A could still be used as a backup if the MZ-1 location is infeasible. However, in addition to the wells located south of Puente Creek we have directed Northrop to install transducers in select wells north of Puente Creek (see attached (EPA email...)). My understanding is that Northrop has access to these wells. Please confirm.

We appreciate UTC's assistance in this matter.

Cc: Maldonado, Lewis; Platt, David UTC
Subject: Re: Draft Access Agreement between Northrop-Grumman and UTC for Use of various wells during the Northrop-Grumman Pumping Test

Brad,

I think there is a misunderstanding. We are requesting UTC's participation in the planned large scale pump test by installing transducers in Shallow Zone wells S11, S09, and VCW-6 and collecting data from these transducers. These wells and the data collection activities therein are the responsibility of UTC/Carrier. EPA expects the data collected will be shared with NGC and vice versa upon completion of the 72 hour test.

NGC contractors will coordinate with UTC on timing and we expect the test to occur in early January 2015.

Upon completion of the test, the CSM will be updated. A joint technical meeting to review the updated CSM will be held before moving forward with updating the numerical model for the Site.

Please reply to confirm UTC's participation in the pump test by November 17, 2014.

Subject: Draft Access Agreement between Northrop-Grumman and UTC for Use of various wells during the Northrop-Grumman Pumping Test

Ray,

In response to your voice mail of Friday November 7, 2014, I am sending you the attached draft Access Agreement permitting Northrop-Grumman to utilize wells S11, S09, and VCW06 during the long term aquifer test that will be performed by Northrop-Grumman. Please forward the attached Draft Access Agreement to Northrop-Grumman so that they can transfer it to their letterhead, insert appropriate names, etc., and return the document and necessary attachments to David Platt Esq. (UTC) for execution. We will return the executed agreement to Northrop-Grumman promptly to minimize potential delay in this activity.

Subject: Request for Conference Call to Discuss EPA's Request for UTC's Participation in the Northrop-Grumman planned large scale pump test

Ray, UTC would like to have a conference call on Monday November 17, 2014 at either 10:30 am or 11:30 am pacific (1:30 pm or 2:30 pm eastern) to discuss your request concerning UTC's participation in the Northrop-Grumman planned large scale pump test by installing transducers in Shallow Zone wells S11, S09, and VCW-6 and collecting data from these transducers, etc. (see you e-mail below). The UTC participants for the call will include David Platt, Esq., Brian Yeich, Brad Barquest and Scott Parsons (Tetra Tech). We request EPA's participants include Rich Hiatt, Lewis Maldonado, Esq., and you.

If the Monday November 17, 2014 times do not work, let's plan on Tuesday at 10:00 am pacific (1:00 pm eastern) as an alternative time. However, I am not sure if Brian Yeich will be available on Tuesday.

Please confirm Rich's, Lewis' and your availability and I will set up a conference call and forward the Dial-In and Access numbers.

NGC contractors will coordinate with UTC on timing and we expect the test to occur in early January 2015.

Upon completion of the test, the CSM will be updated. A joint technical meeting to review the updated CSM will be held before moving forward with updated the numerical model for the Site.

Please reply to confirm UTC's participation in the pump test by November 17, 2014.

Ray

Subject: Draft Access Agreement between Northrop-Grumman and UTC for Use of various wells during the Northrop-Grumman Pumping Test

Ray,

In response to your voice mail of Friday November 7, 2014 , I am sending you the attached draft Access Agreement permitting Northrop-Grumman to utilize wells S11, S09, and VCW06 during the long term aquifer test that will be performed by Northrop-Grumman. Please forward the attached Draft Access Agreement to Northrop-Grumman so that they can transfer it to their letterhead, insert appropriate names, etc., and return the document and necessary attachments to David Platt Esq. (UTC) for execution. We will return the executed agreement to Northrop-Grumman promptly to minimize potential delay in this activity.

Subject: UTC's Response to EPA's Request for UTC's Participation in the Northrop-Grumman planned large scale pump test

Follow Up Flag: Follow up
Flag Status: Flagged

Ray,

I write in response to your email dated November 10, 2014 (below) and as a follow up to our discussions on November 17 and 18, 2014 concerning EPA's request that UTC participate in the Northrop-Grumman planned large scale pump test by installing transducers in Shallow Zone wells S11, S09, and VCW-6 and collecting data from those transducers. Notwithstanding the reservations we have shared with you about whether it is appropriate for UTC to do so, UTC will agree to perform the activities outlined in your November 10, 2014 email. Of course, our agreement is subject to confirmation of the details for performing these activities. It is our understanding that EPA is working with Northrop Grumman to develop a Work Plan and that the Work Plan will be forwarded to UTC in the near future for review and comment.

Call or e-mail with questions.

Bradley A Barquest, R.G.
United Technologies Corporation

Subject: Request for Conference Call to Discuss EPA's Request for UTC's Participation in the Northrop-Grumman planned large scale pump test

Ray, UTC would like to have a conference call on Monday November 17, 2014 at either 10:30 am or 11:30 am pacific (1:30 pm or 2:30 pm eastern) to discuss your request concerning UTC's participation in the Northrop-Grumman planned large scale pump test by installing transducers in Shallow Zone wells S11, S09, and VCW-6 and collecting data from these transducers, etc. (see you e-mail below). The UTC participants for the call will include David Platt, Esq., Brian Yeich, Brad Barquest and Scott Parsons (Tetra Tech). We request EPA's participants include Rich Hiatt, Lewis Maldonado, Esq., and you.

If the Monday November 17, 2014 times do not work, let's plan on Tuesday at 10:00 am pacific (1:00 pm eastern) as an alternative time. However, I am not sure if Brian Yeich will be available on Tuesday.

Please confirm Rich's, Lewis' and your availability and I will set up a conference call and forward the Dial-In and Access numbers.

Cc: Maldonado, Lewis; Platt, David UTC

Subject: [External] Re: Draft Access Agreement between Northrop-Grumman and UTC for Use of various wells during the Northrop-Grumman Pumping Test

Brad,

I think there is a misunderstanding. We are requesting UTC's participation in the planned large scale pump test by installing transducers in Shallow Zone wells S11, S09, and VCW-6 and collecting data from these transducers. These wells and the data collection activities therein are the responsibility of UTC/Carrier. EPA expects the data collected will be shared with NGC and vice versa upon completion of the 72 hour test.

NGC contractors will coordinate with UTC on timing and we expect the test to occur in early January 2015.

Upon completion of the test, the CSM will be updated. A joint technical meeting to review the updated CSM will be held before moving forward with updated the numerical model for the Site.

Please reply to confirm UTC's participation in the pump test by November 17, 2014.

Ray

Subject: City of Industry Indoor Air Sampling

Bizu,

Tetra Tech, on behalf of Carrier Corporation, intends to perform the winter indoor air sampling event at the former Carrier facility in City of Industry, CA on December 26 and 27, 2014. We have learned from the property manager that this weekend may be the only time this winter that the business occupying the warehouse space can accommodate the LARWQCB's requirement of turning off all ventilation for 60 consecutive hours (36 hours of stabilization followed by a 24 hour sampling period). Unless we hear otherwise from you we will proceed with the sampling on December 26 and 27, 2014.

Thank you. Please do not hesitate to call if you have any questions.
